

Ice and Snow Melting Systems

Snow and ice often causes sizeable access inconvenience problems for both vehicles and pedestrians on **roads, ramps, footpaths, stairways** and more importantly **emergency stairways** and **exists**.

Cross Electrical offer a diverse range of snow and ice melting systems, melting snow and preventing ice which can lead to accidents.

Cross snow melting systems are inherently versatile in design and installation, however complex the area to be heated is.

Should the heating cables be;

- Directly under asphalt
- Embedded in concrete or
- Integrated into stairways or steps

Our products provide longevity of service for any application.

- Energy efficiency is the key to our design features
- All systems have '**bespoke**' temperature control panels incorporating electronic controllers with remote sensors mounted in the surface of the outdoor area, providing maximum energy savings.
